## MANUTENZIONE

Per la manutenzione quotidiana è sufficiente pulire la superficie con acqua saponata o con comuni detergenti.

La superficie ha una buona resistenza alle macchie e all'attacco chimico, tuttavia alcune sostanze come inchiostro, cosmetici e tinte potrebbero lasciare alcune macchie che andranno rimosse con un sapone abrasivo, un sapone acido o un sapone solvente (secondo la sostanza macchiante), aiutandosi con una spugna. La tintura di iodio macchia la superficie in modo permanente. Evitare il contatto con acetone e trielina.

## MAINTENANCE

For daily maintenance it is sufficient to clean the surface with soap water or common detergents.

The surface has a good resistance to stains and chemical agents, nonetheless some substances like ink, cosmetics and colorations could leave some stains which have to be removed with the help of abrasive soap, acid or solvent containing soaps (depending on the staining substance), and a sponge. Jodine tincture stains the surface.

Avoid contact with acetone and trichlorethylene.
